

Get a real shed at a real value price

BF Sheds and Garages are pleased to announce that they are an authorised distributor for Fair Dinkum Homes & Sheds, which is leading the industry to be one of the first businesses to receive The Australian Steel Institute's (ASI) new industry benchmark for steel sheds – ShedSafe.

"In the past, shopping around for a shed has been a time-consuming and confusing process for consumers," said Sharon Moy, of BF Sheds and Garages.

"We distribute Fair Dinkum Homes & Sheds which are Shed-

Safe accredited so you are assured of a shed or barn design that complies with the standards set by the BCA.

"If you are dealing with a brand that is not ShedSafe accredited, you should ask them why.

"We are a reputable local family business that is focused on providing a real shed at a real value price."

Primarily, ShedSafe is about safety for the consumer and it serves to protect the investment in a shed and its contents.

Consumers can be confident in the fact that Fair Dinkum

Homes & Sheds ensure that all standards set by the BCA are incorporated into the design process of each shed, and they are able to provide a shed design suitable to specific sites and locations. Unlike some manufacturers that supply the same shed designs in locations all over Australia, they also take into account anticipated usage and environmental factors such as wind load on the structure.

"We are extremely proud that we distribute for one of the first businesses in Australia to receive ShedSafe accreditation," Sharon said.
